

Benefits of Patchouli Essential Oil

Benefits of Patchouli Essential Oil include promoting sleep, boosting the immune system, repelling insects, regulating oily skin and acne, reducing inflammation, helping balance emotions, promotes healing, and acting as an aphrodisiac by stimulating sex hormones.

Patchouli essential oil comes from the lightly fragrant leaves of a bushy tropical perennial evergreen bush (*Pogostemon cablin*) growing several feet in height. The plant originally comes from the Southeast Asian countries of China, Malaysia, Indonesia and the Philippines. It typically grows at altitudes of 800-1000 feet above sea level in warm and humid climates. Most of patchouli essential oil now comes from Java and China.

It has long been a part of Asian medicine. The Romans used patchouli oil to stimulate the appetite.

The leaves are partially dried in shade and allowed to ferment for several days. The oil is extracted using steam distillation or CO₂ extraction.

Aromatherapy and Cosmetics Uses

It has a pleasant, earthy, woody aroma that is often used in soaps, body lotions, incense and cosmetics.

Therapeutic applications often make use of its antidepressant, antiseptic, aphrodisiac, fungicide, insecticide, sedative, and astringent properties. It is used in Japan and Malaysia as a snakebite venom antidote.

Benefits of Patchouli Essential Oil Come From its Organic Compounds

It's varied properties come from the organic chemical

compounds found in the oil. An article ([Comparison of extraction of patchouli \(Pogostemon cablin\) essential oil with supercritical CO2 and by steam distillation](#)) in *The Journal of Supercritical Fluids* describes the organic compounds in patchouli essential oil. The researchers used different extraction temperatures and pressures to obtain samples of the oil. They used a gas chromatograph to determine the chemical composition for each sample. A list of the ranges found for major components (with a presence greater than 1%) is as follows:

- Patchoulol (12.93 – 31.39%)
- α -Guaiene (13.38 – 24.16%)
- δ -Guaiene (15.55 – 23.3%)
- α -Patchoulene (4.80 – 6.21%)
- β -Patchoulene (1.62 – 3.26%)
- β -Caryophyllene (3.13 – 5.85%)
- α -Selinene (0.21 – 3.9%)
- Seychellene (1.72 – 3.3%)
- β -Elemene (0.5 – 1.8%)

As you can tell, the exact proportions of the compounds in the oil vary depending on how the oil is extracted. Try several brands of this oil to see which gives you the best results.
